

STARKSCAN

StarkNet.js Updated for v0.10.2

Sean, in collaboration with

★ Nov 2022

How did I get involved with StarkNet?

- Looking for a long term ETH scaling solution
- Wanted to build a web application
- No library for web applications to interface with StarkNet

What is StarkNet.js?

- Allow JavaScript programs, like Web and Mobile Apps to interface with the StarkNet network
- Follows ethers.js architecture in Ethereum
- Primary APIs are Providers, Account, Signer, and Contract

Starknet.js V3 API - Overview

- Provider
- Account
- Signer
- Contract

What has changed since last Starknet.js workshop?

- Fees
- Deploy Account Transaction
- New way to deploy account from scratch using Starknet.js

New Account Deployment Method

- Calculate the to-be-deployed account contract address
- Send funds to the to-be-deployed account
- Deploy the new account contract

Thank You
